

In just a few minutes you can install state-of-the-art air purification technology into your HVAC system and increase the effectiveness of your *Fresh Air by EcoQuest* and *Breeze^{AT}*. *Fresh Air DuctwoRx* utilizes your HVAC fan to deliver safe oxidizers and super-oxide ions throughout your home, amplifying the effectiveness of your existing EcoQuest air purification units and improving the quality of air passing through your HVAC system.

Fresh Air DuctwoRx features:

- "Certified Space Technology" Radiant Catalytic Ionization (RCI) which incorporates the same process NASA uses to scrub the air inside their spacecraft.
- Germicidal broad spectrum high-intensity UVX lamp .
- A specially engineered matrix with a patent pending proprietary multi-metallic coating.
- An exclusive design engineered to work in conjunction with *Fresh Air by EcoQuest* and *Breeze^{AT}*.

At EcoQuest International we take our mission seriously

both in the Opportunity we provide and in the products and services we offer.

Today, American families spend more than 90% of their time inside. The dust in the carpet can be the equivalent of toxic waste. The water at the kitchen sink, which we thought was safe, frequently contains contaminants that may be putting our health at risk.

Experts say that between 2 and 10 million dust mites live in your mattress, and another 2 million live in your pillow.

At EcoQuest, issues like these are important to us because they are important to you and your family.

We are driven by our purpose: To enhance and improve the quality of living indoors by providing products which bring safety, convenience, and beauty into the spaces where people spend their lives and to provide real life-changing Opportunity.

Your Prescription for Cleaner Air

The *Fresh Air DuctwoRx* uses EcoQuest's exclusive RCI Technology - the same technology built into products like *Fresh Air by EcoQuest* and *Fresh Air Spectrum UVX*. *DuctwoRx* takes advantage of the germicidal and ionizing properties of UV and combines them with the photocatalytic reactions of specific rare and noble metals to create Radiant Catalytic Ionization (RCI). This innovative use of light and metals is what makes *Fresh Air DuctwoRx* so effective.

RCI and SynAirG air purification technology is delivered to every room, anywhere there is a register

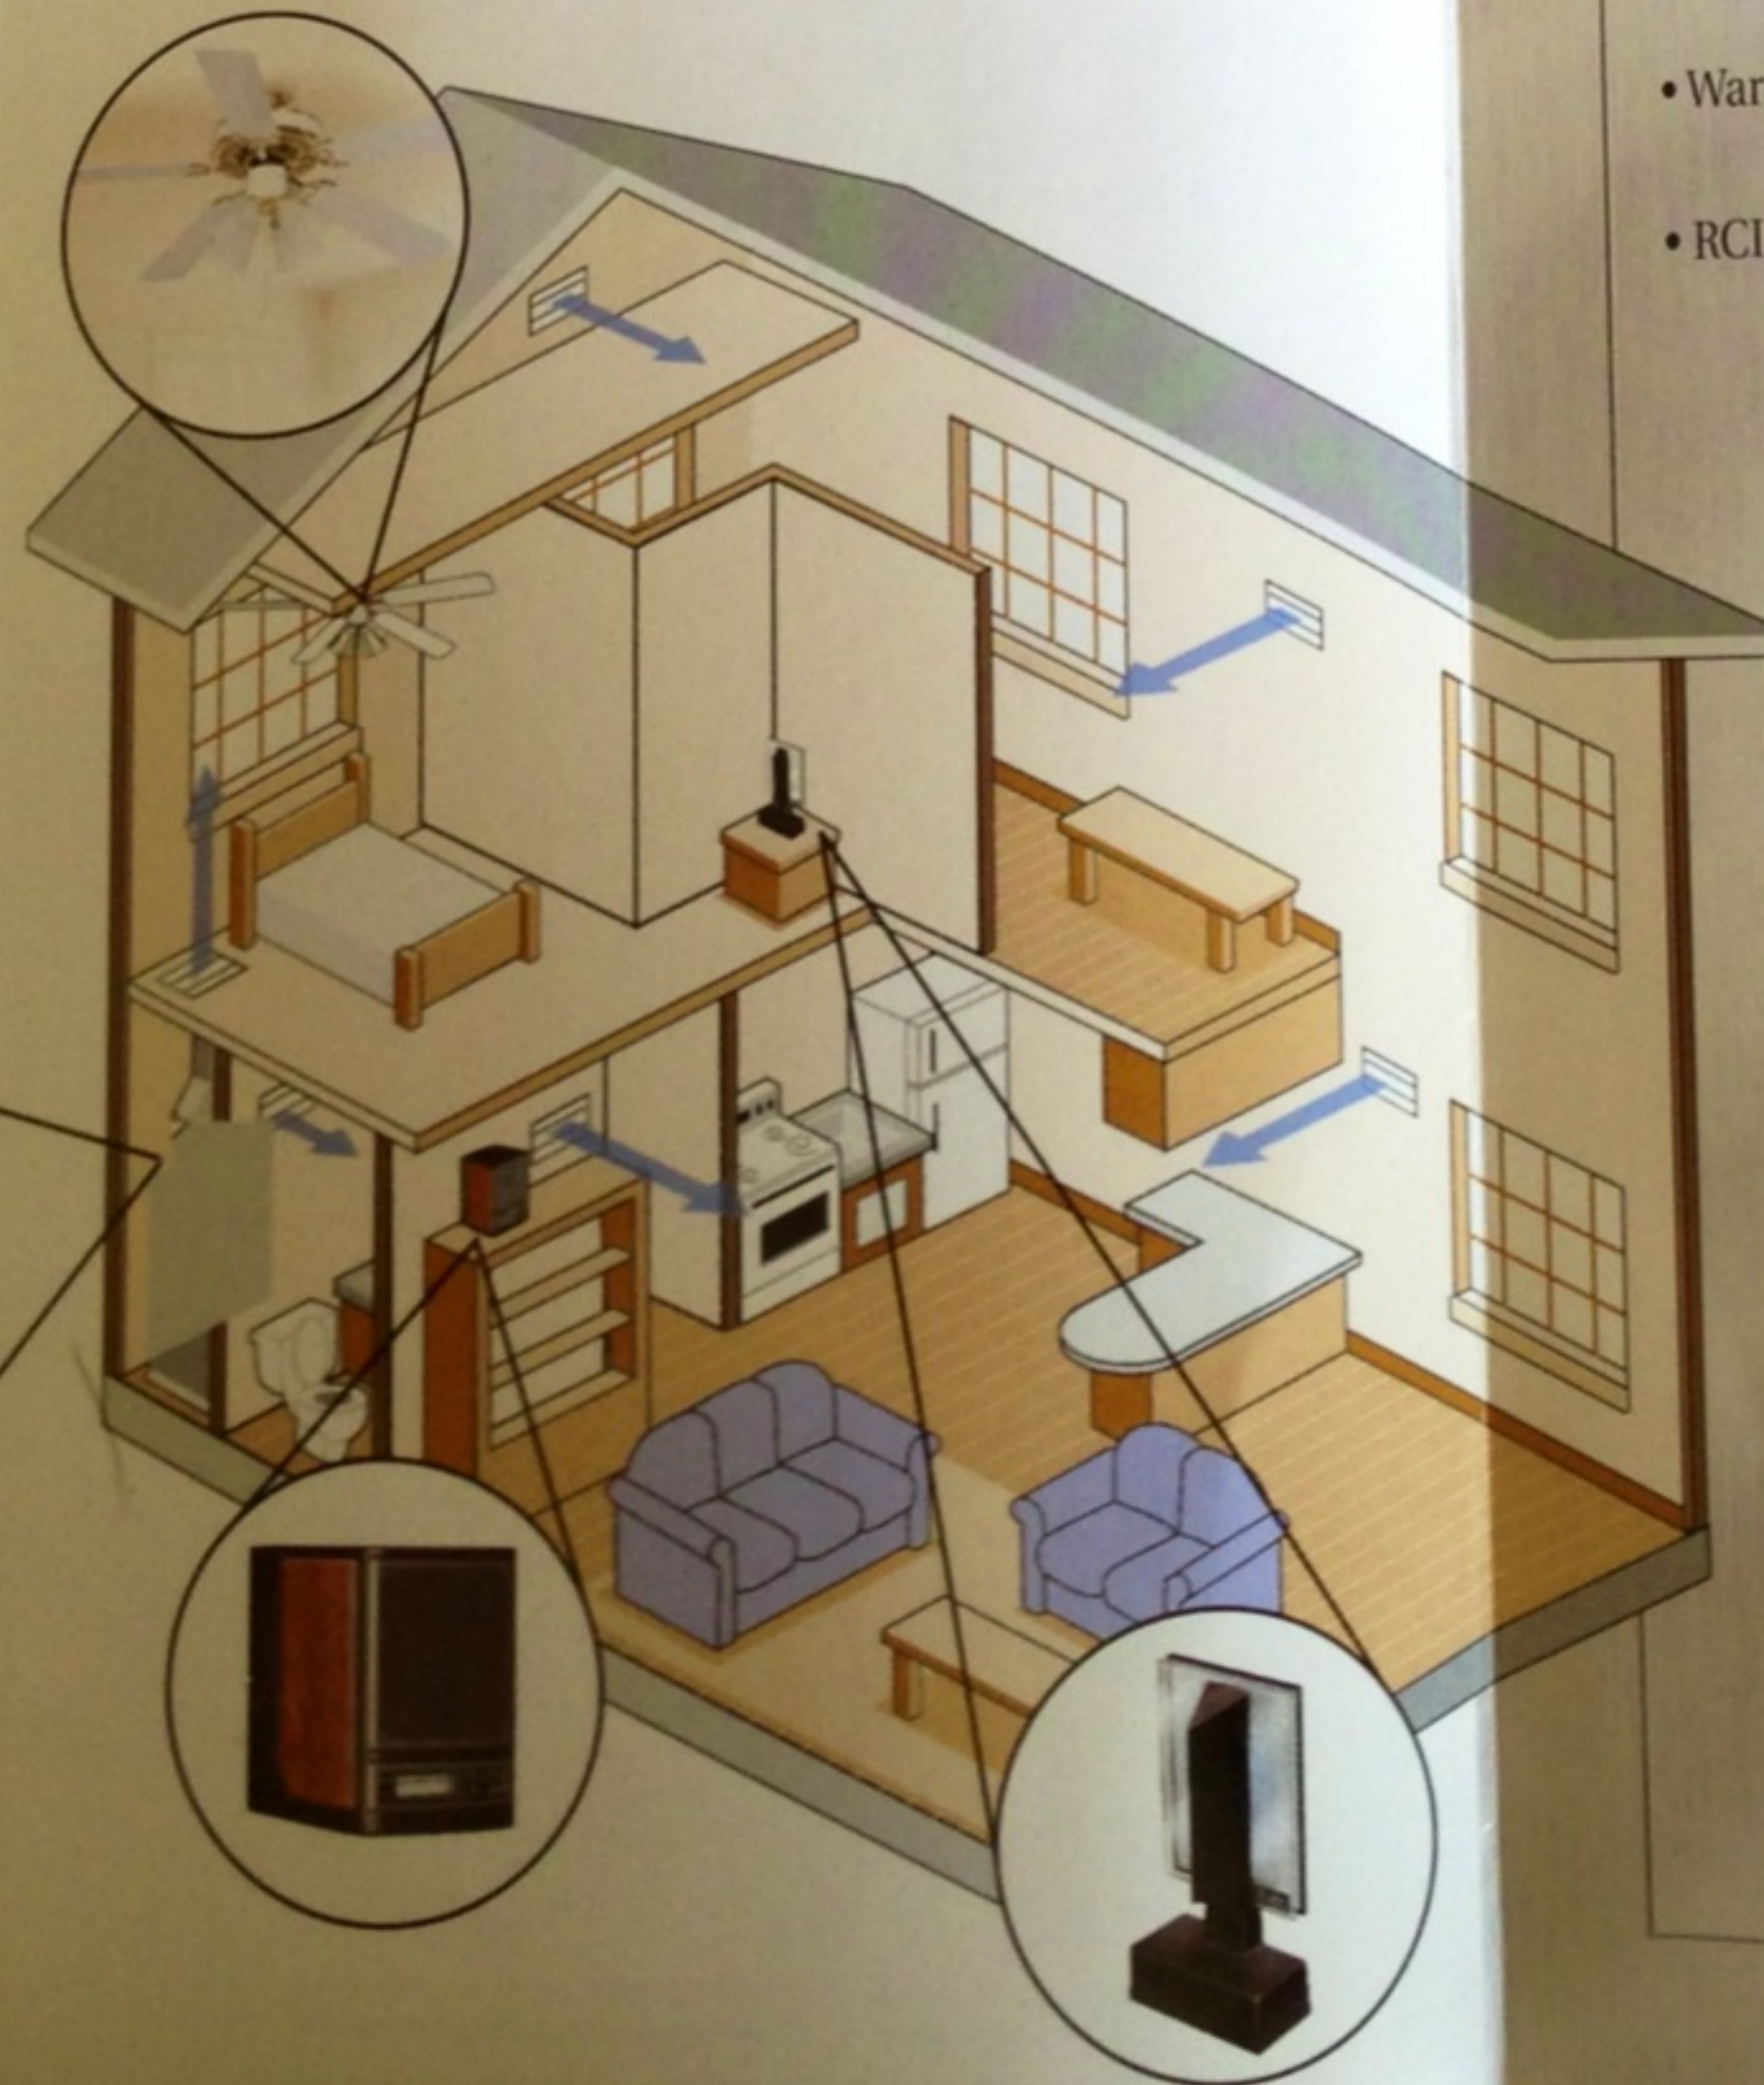

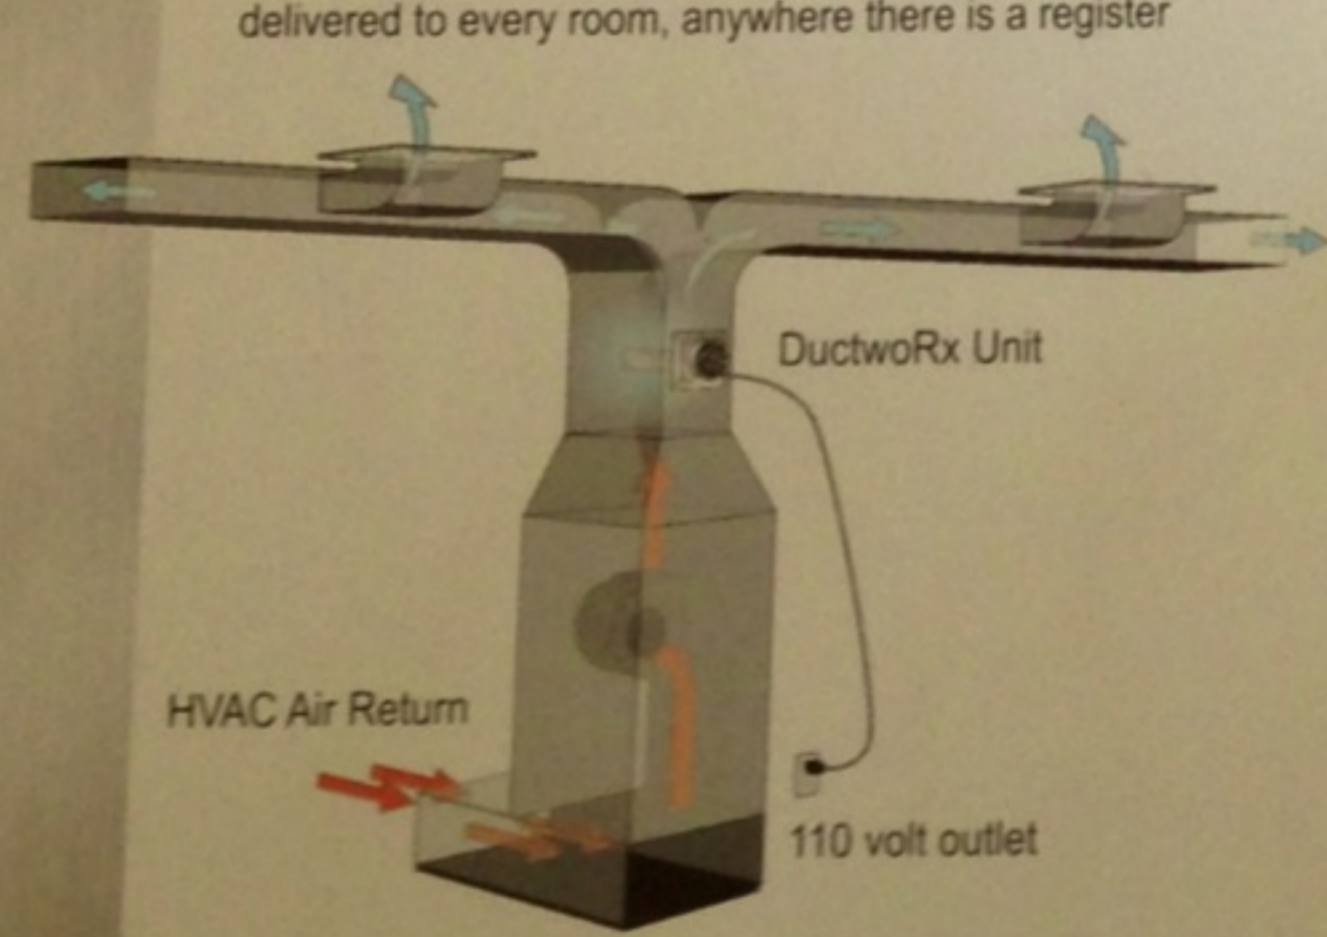

Enhanced Whole-Home Air Purification

Enhance the power of *Fresh Air by EcoQuest* and *Breeze^{AT}* throughout your entire home! The *Fresh Air DuctwoRx* amplifies the extraordinary benefits of EcoQuest air purification systems, using your HVAC system fan to distribute those benefits where you need them. From the basement to the attic, even if you've already got a *Fanfaire* or *Fresh Air Spectrum UVX*, each room will be fresher and every air purifier more effective. *DuctwoRx* it's available only from your local EcoQuest Dealer. Call today for more information.

Specifications

- Hydroperoxides distribution: ... air handler
- Superoxide Ion distribution: air handler
- Ion distribution: air handler
- Installation: Duct or Plenum
- Electrical: 110 VAC 60 Hz
50-90 Watts
- Warranty: 3 year parts & labor
1 year on RCI cell
- RCI Cell Replacement: Recommended every 3 years

Space technology for your home.

"EcoQuest has been awarded use of the Certified Space Technology seal because they have effectively applied space-based technology to address the real and growing concern of indoor air pollution and improve the quality of life for people here on Earth."

- The Space Foundation
Director of Space Awareness Programs
